(54) GRANULAR NONIONIC DETERGENT
COMPOSITION AND PRODUCTION THEREOF

(57) Abstract:

PROBLEM TO BE SOLVED: To provide a granular nonionic detergent compsn. of which the detergency after long storage can be improved.

a layered silicate having an average secondary granule size of 200 μm or lower and a bulk density of 0.4-0.7 ml/g, and (c) a swellable clay mineral, extruding the resulting mixture, subjecting the extrudate to crushing granulation or stirring granulation, and coating the resulting granules with a nondeliquescent fine powder.

COPYRIGHT: (C)1999,JPO

SOLUTION: This detergent compsn. contains (A) granules contg. (a) a nonionic surfactant, (b) a layered silicate having an average secondary granule size of 200 μm or lower and a bulk density of 0.4-0.7 ml/g, and (c) a swellable clay mineral and (B) a nondeliquescent fine powder attached to the surfaces of the granules and is prepd. by mixing ad kneading (a) a nonionic surfactant, (b)
